Session 1 *Adventures in Music!*

The Elementary Music Summer Program brings all of the experience and excitement of our camps to beginning musicians. It is designed to help children develop a life-long love of music. Children will be exposed to singing, playing instruments they make, moving to music, creating music, and the basics of reading and writing music. Participants will also have the opportunity to experience music from around the world.

Session 2 *Super Science*

A practical hands-on science and craft program for kids to enjoy and explore the amazing world of science! Conduct experiments with food coloring, baking soda and other safe ingredients. Make your own oobleck! Build paper airplanes, sturdy bridges, and balloon powered cars amongst other fun STEM activities.

Session 3 *Origami-tronics*

Transforming a piece of paper into something else is an experience children can truly appreciate. Watching a child's eyes light up when they complete an Origami for Kids model is priceless! We add simple coin batteries, colorful LED lights and buzzers to make them come alive!

Session 4 *Optics & Lasers*

This practical Physics program demystifies concepts in Optics (Light as waves, mirrors, lenses, how do lasers work, communication with light etc. with a hands-on learn by making approach. We build projects like Periscopes, Galilean telescopes, Projectors, Virtual Reality Goggles, optical illusions and much more!

Session 5 *Explorations in ART*

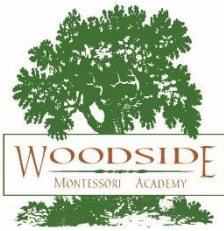

Let your ingenuity guide you as you recreate classic and modern art styles and create art that is unique to you. We will have a variety of mediums for you to explore. Make your imagination come to life through art making. Let's create together this Summer!

Session 6 *EV3 – Mission to Mars*

Children work on a special Mars mat and Mars Rocket parts and Lego parts that simulate craters and uneven terrain and solve a set of Robotic challenges very similar to Lego competitions. Participants learn sensor control, programming, testing and engineering design while working on Mars inspired Robots in Space theme!

Session 7 *3D Printing and CAD*

CAD and 3D Printing introduce students to basic 3-D modeling. Primitive shapes, measurement, hollow objects & assemblies. Students learn the tools needed to design exciting projects. Students keep the 3-D printed models that they make! This revolutionary course makes the world of 3D printing — what once felt like the stuff of science-fiction — accessible to younger learners, while providing a foundation in critical technology and engineering skills. Now, children everywhere can learn to conceptualize, design and print in 3D!

2020 Summer Program Registration

Project Explore! For Rising Grades 1 - 5

*Must have completed kindergarten

Must register by July 1st: t-shirt size: YS___ YM___ YL___ YXL___

Student Last Name _____ First Name/Nickname _____ DOB _____

Parents' Names _____ Student's School & Grade _____

Home Address _____ Town _____ State _____

Home Phone _____ Cell Phone _____ Email _____
